Telecom News:

Tower Art: Telecom structures get a new look

The Indian telecom tower industry has witnessed significant growth in the past few years, aided by escalation in subscriber density and surge in data uptake. The number of telecom towers in the country has quadrupled from 100,000 in 2006 to 420,000 in 2016. Despite this, the installed tower infrastructure in the country is way less than that required to ensure ubiquitous connectivity and a seamless user experience.

A significant reason for the shortfall is the resistance by the general public and local authorities to the installation of mobile towers. The public continues to be wary about the electromagnetic field radiation (EMF) emanating from towers despite the fact that India has one of the most stringent EMF standards in the world. Meanwhile, there have been several instances of sealing of towers by municipal authorities over issues related to the legality of installations, licence fees, etc.

A number of positive developments are expected to ease this situation. The Department of Telecommunications (DoT) has issued the much-awaited right-of-way rules, laying down a framework to provide approvals for tower installations and settle disputes in a time-bound manner, as well as improve the coordination between telecom companies and government authorities. DoT has also been organising countrywide EMF awareness programmes to address and allay the concerns of people regarding tower radiations. Moreover, the government authorities have been asked to allow the installation of telecom towers on their premises.

Tips on Teamwork:

Know the strengths and assign roles according to them.

Accept the mistake and learn from it

Discuss more than argue

Apprehend the mission.

Establish a dynamic in common

Listen more than hear

Accept chaos and incorporate creativity.

“Teamwork - coming together is a beginning, keeping together is progress, working together is success” –

Henry Ford

Awareness Program on World Cancer Day – 4 Feb 2017

At Global we have chosen certain international days in the year to celebrate.

February 4th is World Cancer Day. We took this opportunity to spread the word and raise awareness about cancer in people's minds by placing the attached posters in your respective office

What is World Cancer Day?

- ❖ A truly global event taking place every year on 4 February, World Cancer Day unites the world's population in the fight against cancer.
- ❖ It aims to save millions of preventable deaths each year by raising awareness and education about the disease, pressing governments and individuals across the world to take action.

World Cancer Day's primary objective
To get as many people as possible around the globe to talk about cancer on 4 February
